PROFESSIONAL SUMMARY

A technology professional with over a decade of experience spanning software delivery and system analysis across banking, insurance, and retail domains — with extensive 2+ years of hands-on experience in data analytics and Power BI. Brings advanced SQL skills, strong Power BI expertise (DAX, Power Query, Data Modeling), Advanced Excel, and a demonstrated ability to translate business requirements into KPI dashboards and actionable reporting.

SKILLS

SQL: Joins, Aggregations, Window Functions, CTEs, Query Optimization (SQL Server, DB2)

Power BI: DAX, Power Query, Data Modeling, Dashboard Development, KPI Reporting, DirectQuery & Import Mode

Excel: Pivot Tables, Lookups, Automated Reporting

Analytics: Data Cleaning & Transformation, EDA, Data Validation & Quality Checks, Trend Analysis, Business Reporting

Working Knowledge: Python (Pandas, NumPy), Tableau, Data Warehousing Concepts

Soft Skills: Stakeholder Communication, Analytical Thinking, Adaptability, Attention to Detail

PROFESSIONAL EXPERIENCE

United Techno, Chennai — 10/2022 – 12/2025

Power BI Analyst (Contract) — 08/2024 – 12/2025

- Designed and delivered Power BI dashboards for business stakeholders across operations and performance tracking through automated data refresh and structured KPI layouts.
- Created DAX measures and Power Query transformation workflows covering KPIs across trend analysis, period-over-period comparisons, and operational benchmarks — enabling faster, consistent, data-driven decision-making.
- Developed a KPI tracking system in Power BI, collaborating with stakeholders on reporting requirements — heightening executive awareness of critical performance metrics and supporting more informed business decisions.
- Delivered KPI, SLA, and operational reporting solutions; ensured report accuracy through structured data validation and reconciliation against source systems.
- Performed UAT testing and report validation to verify dashboard outputs against business requirements before stakeholder sign-off and production release.

Technical Lead — 10/2022 – 10/2023

- Worked with large-scale warehouse and operational datasets (10K+ records/day) on AS400/DB2 systems, supporting business processes and reporting across operations.
- Created complex SQL/DB2 queries to extract meaningful insights from large operational datasets, improving data-processing efficiency by 20–25% and enabling faster decision-making across business functions.
- Created Excel-based KPI trackers covering 5–8 key metrics, improving visibility into operational performance.
- Automated recurring reporting workflows, reducing manual effort by 25–30% while improving accuracy.
- Took ownership of an emerging Power BI requirement within the team, built initial dashboards and DAX-based KPI reports, and transitioned into a dedicated Power BI Analyst role based on delivery.

Medical leave (11/2023 – 07/2024) following spine surgery; fully recovered and returned to active contract delivery.

Career Break — Deepening Data Analytics Expertise — 01/2026 – Present

- Broadened expertise across the full data analyst stack — SQL (advanced), Tableau, Python (Pandas), statistical analysis, ETL concepts, data warehousing, and cloud data basics (Azure/BigQuery) — through end-to-end industry projects in retail and insurance that mirror real-world business scenarios.
- Completed Microsoft PL-300 (Power BI Data Analyst) certification, formally validating hands-on Power BI expertise built through professional delivery.

Cognizant, Chennai — Senior Associate — 09/2018 – 03/2019

- Analyzed high-volume transactional data on AS400/SQL systems for retail and automotive clients; optimized SQL queries and backend logic, improving system efficiency by 15–20%.
- Supported business reporting through SQL-based data extraction and stakeholder coordination.

Career break following relocation and family transition; returned to workforce in 2022 with United Techno.

UST, Chennai — System Analyst **12/2016 – 09/2018**

- Delivered system enhancements on AS400/SQL platforms for banking and insurance clients, executing end-to-end SDLC cycles — from requirements analysis and impact assessment through coding, testing, and UAT to production release; ensured data integrity across all delivery stages.
- Wrote SQL queries to extract, validate, and reconcile data across AS400 systems in support of business reporting; translated stakeholder requirements into technical specifications and verified system outputs against expected business outcomes.

HCL Technologies, Chennai — Senior Software Engineer **06/2014 – 12/2016**

- Developed and enhanced AS400-based applications for insurance domain clients — involved in coding, impact analysis, testing, and SDLC delivery; additionally built Excel-based operational dashboards from incident and service data, providing management visibility into monthly performance trends and SLA metrics.

Mphasis, Chennai — Delivery Software Engineer **09/2010 – 06/2014**

- Built and tested database-driven applications across design, coding, and validation phases of SDLC; authored test cases, executed UAT cycles, and ensured data accuracy and quality standards were met across delivery milestones.

EDUCATION

Bachelor of Engineering, Electronics and Instrumentation 04/2010

Anna University, Chennai, India
